---

I spoke to her this morning to see how there approvals were coming. I will hit her up on the solids when she calls me back.

Thanks,

**Beth Crawford**

**Subject:** CES: FT1001

Beth:

I talked with Demita last week and provided her with a sample of the material from FT1001. I told her that there will likely be some solids at the bottom of this frac tank that I would like to be able to suspend in water on the cleanout for the last load. She indicated that she thought that would be ok although there may be some additional charges for excess solids. I would appreciate this if you could talk to Lonestar about this.

Thanks
